

Clerk to Boothby Pagnell Parish Council  
The Old Rectory,  
Boothby Pagnell,  
Grantham, Lincolnshire,  
NG33 4DG

Friday 1<sup>st</sup> May 2015

Dear Sir/Madam,

**Town and Country Planning (Development Management Procedure and Section 62a Applications) (England) (Amendment) Order 2013**

**Proposed 250kW Wind Turbine (overall tip height 45m) at Railway Farm, Great Ponton, Grantham, Lincolnshire, NG33 5DP.**

York Green Renewables has been instructed by the landowner to investigate the feasibility of installing a single wind turbine on land at Railway Farm, near Great Ponton. York Green Renewables is a renewable energy company which seeks to find renewable energy solutions for our clients.

The above Development Management Procedure Order requires that we seek the views of the local community prior to submitting an application for a wind turbine. We would therefore welcome your comments so that we might understand any planning concerns raised and consider any possible mitigation as part of the planning application.

I enclose a leaflet which sets out in broad terms the proposal. More detail may be found on our community website [www.yorkgreencommunity.eu](http://www.yorkgreencommunity.eu) and you may also use the website to submit your comments.

Planning legislation requires any responses to be submitted to ourselves. Please send any comments in writing to the address below or via the community website. Please ensure that your comments reach us by 29<sup>th</sup> May 2015.

We look forward to hearing your comments.

Yours faithfully,

Martin Price BA (Hons) Dip EP MRTPI  
Head of Planning
